

# GRACE POINTE CARE

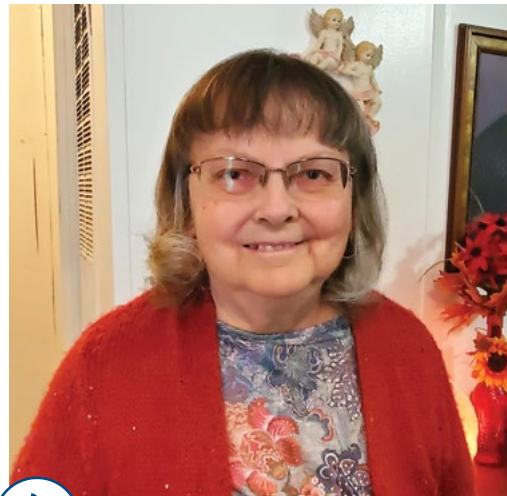

CARE • ASSESS • REPORT • EMPOWER

## report

The Grace Pointe Senior “C.A.R.E” Report serves to showcase the efforts put forth by Grace Pointe to care for its residents.

**Mitzie Jones**

REHABILITATION GRADUATE

**- Testimonial -**

"I just can't say enough good things about everyone there - I recommend Grace Pointe to everybody I talk to. It was a little emotional leaving because I felt so safe there. I am so blessed to have been able to (go to Grace Pointe) for my rehab, where I was only encouraged to heal. Thank you, Grace Pointe, for such a positive experience!"

**- Mitzie Jones**

## A Testament to Care

### Mitzie Recalls Her Experience at Grace Pointe's Rehabilitation Center

**Q: Tell us a little bit about your care needs that brought you to Grace Pointe's Rehabilitation Center**

I broke my shoulder, ribs, and elbow and was in a lot of pain, but they were very accommodating day and night. I had trouble getting comfortable and no matter who was in the room they would always adjust me. That level of care and their presence made a huge difference in my progress.

**Q: Tell us about the physical care you received while at Grace Pointe**

My therapists were incredible - all three of them! When I first got to Grace Pointe, we started out mostly walking, and I didn't even get to do that in the hospital. I had only stood up one time at the hospital, and that was to leave. Shortly after starting therapy at Grace Pointe, we did balancing and strengthening exercises. They even did exercises so that I could come home and cook - which I've done every day since I've been back! I was able to go at my own pace and everyone was so patient. Only a week after I started therapy I was able to go all the way to the end of the hall, and that felt so good because I'm a walker!

**Q: What made Grace Pointe a special place to you?**

I joke that I 'adopted' one of the team members! Lauren is my new adopted daughter. She was just so sweet, she would braid my hair and went above and beyond to make me comfortable. Whatever I needed, every time she came to my room she did way more than I would have ever asked for. She was a doll, I just love her! Whether

it was Lauren spending time with me exchanging our favorite family photos or others just stopping in to talk to me it was just those connections that made it so personal.

**Q: How did Grace Pointe help you stay connected during your stay?**

I was at Grace Pointe for two weeks over the holidays. My kids did a video call with me on Christmas, and I'm not technical but Grace Pointe set it all up so I could be a part of the whole Christmas and watch my family open presents! I was so emotional over it that I couldn't fully interact but it was so fun. I thought, "this must be what it's like to be in heaven" where you can just sit back and see all the good going on.

**Q: Overall, how was your experience at Grace Pointe?**

My experience at Grace Pointe was amazing. The entire staff, right down to the cleaning (team), were always kind, helpful, and cheerful. Everyone every step of the way was so attentive to me. Not to mention, the food at Grace Pointe was scrumptious. I felt like I was in a restaurant with the room service the nurses provided. It was all so unexpected! I knew Grace Pointe was a good place to go because I used to be a caregiver for many years so I had been to Grace Pointe twice a few years ago when I had clients there. I liked it back then, but I had no idea it was as nice as it is!

Erik Briscoe

DIRECTOR OF BUSINESS DEVELOPMENT

## How Our 'Air Scrubber' System Addresses Needs & Achieves Care

**A Message from Erik Briscoe, Second-Generation Owner, and Director of Business Development at Grace Pointe**

Having been raised in this community and knowing the residents and families at the highest risk, we take our responsibility to maintain the best environment possible for our residents very seriously. While we have implemented the highest level of sanitization and social distancing practices at Grace Pointe, studies show that shared air (HVAC) systems make it possible to spread illnesses.

At Grace Pointe, we recently installed a Needlepoint Bipolar Ionization (NPBI) air purification system at our campus to fight against the airborne transmission of illnesses, such as COVID-19 and the flu. By investing in this cutting edge whole-building air scrubbing system, we are addressing the need of better air quality for every member of our care community.

We chose NPBI as a solution to our shared air concerns because it has been tested and proven to destroy COVID-19. In an independent study, needlepoint bi-polar ionizers were placed inside of a room where coronavirus patients had been housed. Within 10 minutes, the ionizers destroyed 99.4 percent of the coronavirus particles in the air and 80 percent of surface-living particles.

Outside of the current overwhelmingly urgent need, this system will benefit the wellbeing of our residents and staff by better addressing air-quality for years to come. Our family and company continually assess needs to achieve the highest quality in every aspect of care we deliver to residents — including the research and adoption of industry-leading technologies — and will continue to do so long after the threat of COVID-19 subsides.

Jennifer Peterson

DIRECTOR OF MARKETING

### - Testimonial -

"This year has been challenging for everyone but we have persevered as a team and we are so proud to work with such a dedicated team who place the care and safety of our residents as their highest priority!"

- Jennifer Peterson

## Grace Pointe COVID Vaccine Clinics

**Grace Pointe received 6 COVID Vaccine clinics under the CARES Act with the vaccine being administered free of charge and on a priority basis between the beginning of January and the end of February.**

JAN  
2

**On January 2, 2021 we held our first vaccine clinic for staff and skilled/rehab residents!**

80%

**We exceeded our goal of 80% of the staff having received the vaccine. In total, 91% of staff received their vaccination.**

98%

**98% of the residents have received their COVID-19 Vaccine.**

**Ashley Flores**

ALZHEIMER'S ASSOCIATION NORTH  
EAST REGION DEVELOPMENT MANAGER

#### - Testimonial -

"As a development manager my main goal is to bring in revenue. My focus is broken down into two pillars - development and programming - so I work to develop the awareness and funds needed so that our program team can go out and provide all of our services at no cost to our community."

- Ashley Flores

## Empowering Our Industry Through Partnerships

### Alzheimer's Association NE Development Manager, Ashley Flores, Shares Her Insight

#### What is the Mission of the Alzheimer's Association?

Our mission is to one day have a world without Alzheimer's or any type of dementia. Our programs are mainly focused on our caregivers. Once you can get inside a caregiver's world and really get them the help that they need, the person living with Alzheimer's directly receives much better care. We get out in the community to assess needs and mold our efforts to fit those needs.

#### How Has The Senior Healthcare Industry Evolved?

It can be broken down to the actual physical care given to residents, to mental health and how caregivers provide. There's been a lot more research recently that has shown better ways to keep our seniors healthy. That's probably one of the best ways to describe how most care facilities like Grace Pointe are evolving their care services.

#### How Do the Alzheimer's Association and Grace Pointe Partner together?

My impression of Grace Pointe as a partner is that they are always excited to get involved in whatever way they can. I believe the main message to our community is that Grace Pointe supports all kinds of causes, especially for their residents' benefit. This has really helped to evolve our industry and transform the stigma of care communities.

## Grace Pointe Gives Back

### Alzheimer's Association Weld County Walk to End Alzheimer's

Grace Pointe is proud to be locally owned and part of the Greeley community. We have made it a commitment to serve others and give back to the community through fundraising efforts we call "Grace Pointe Gives Back."

We are so thankful for the Alzheimer's Association and proud to support them in the Alzheimer's Association Weld County Walk to End Alzheimer's. We have been participating in the walk for 9 years to help bring awareness and funding for people and families who have been affected by Alzheimer's and over the course of the years have raised \$33,551.14! Many years we have also served as the food sponsor providing pancakes, sausage, juice and other breakfast items for everyone participating in the walk.

In 2020 the Grace Pointe team was able to raise over \$4,000 for the cause from generous donors in the community including a matching donation from the family owner of Grace Pointe.

We are looking forward to participating in the 2021 Walk to End Alzheimer's and continuing to support the Alzheimer's Association for years to come!
